Controlling:

- Budgeting by company
- Budgeting vs. Actual by Global Dimension
- Budgeting vs. Actual by Shortcut Dimension
- Corporate Profit and Loss Statement

Main distributor for Central and Eastern Europe, Jet Reports Poland, has implemented a reporting system for Eurozet, a company whose main revenue stream comes from production and distribution of the radio programs. It also provides the radio station brokerage and production of the radio advertising.

Implementation of the solution has been done by Columbus Polska, partner of Jet Reports Poland. Consultants have been responsible for enriching the business processes with reporting from Microsoft Dynamics NAV system.

Main solution created with Jet Reports was the implementation of rich Excel reporting from modules like: **Finance, Controlling and Fixed Assets**.

“Reports included in the implementation have reached all areas of the Dynamics NAV system. Most important were Finance reports, Fixed Assets, controlling and Debt Retrievals. Eurozet is a part of joint-venture called LARI (Lagardere Active Radio International) group spread through eastern and western Europe. Group’s monthly reporting based on 50+ companies in the database has been reached with an easy to use Jet Scheduler which is reporting automatically all intercompany postings throughout the group. Costs and profits reports are created within hours not days as it was before implementation of Jet Reports. This program is irreplaceable when it comes to Corporate Reporting” – says Mr. Tomasz Drabas, consultant of Columbus Polska.

Jet Reports

Imagine visibility into your business.

You own an excellent accounting system; it lets you store all of the data you need about your customers, vendors, inventory, product sales, and financial position. But how much time do you spend transferring that data into spreadsheets?

Imagine getting all the information you want, when you want it, in the format you want. Financials, cash position, inventory, sales, customer reports, budgets, even project information is at your fingertips—all in Excel. Jet Reports is visibility into your business.

Where will your information take you?

The Jet Ribbon makes it easy to find what you need.

Jet Wizard

With the Jet Wizard, you're just a few simple steps away from a completed report.

Jet Scheduler

The Jet Scheduler allows you to automatically refresh and distribute reports by email to your designated recipients.

Jet Designer

The Jet Designer provides visibility into your business. See all of your information then use the **Drag and Drop** feature to design your report.

Drilldown

With Jet Reports drilldown, you are only one click away from your Dynamics data.

Jfx

With Jfx, you can insert report functions with ease. Jfx allows you to create formulas step by step using your data.

Universal Connector

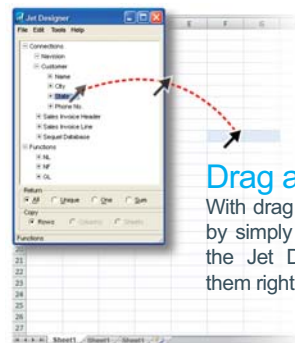

Not just for Dynamics. Jet Reports can connect to all of your applications.

Online Help

Jet Reports provides comprehensive online help. Simply type F1 for tutorials and references.

Build reports quickly with this amazing Jet feature.

Drag and Drop

With drag and drop, you can build reports by simply clicking on the desired fields in the Jet Designer window and dragging them right into Excel. It's that simple.
